

Main.java

build.gradle

42kahkrmx

```
1 ▾ interface Utility {  
2 ▾     static void printMessage(String message) {  
3         System.out.println(message);  
4     }  
5 }  
6 ▾ public class Main {  
7 ▾     public static void main(String[] args) {  
8         Utility.printMessage("Hello, World!");  
9     }  
10 }
```

Main.java

```
1 interface Vehicle {
2     void start();
3     void stop();
4 }
5
6
7 // Car class implementing the Vehicle interface
8 class Car implements Vehicle {
9     @Override
10    public void start() {
11        System.out.println("Car has started.");
12    }
13
14    @Override
15    public void stop() {
16        System.out.println("Car has stopped.");
17    }
18 }
19
20 // Main class to test the Vehicle interface and Car class
21 public class Main {
22    public static void main(String[] args) {
23        Car myCar = new Car();
24        myCar.start();
25        myCar.stop();
26    }
27 }
```
