

in.java

Run

Output

```
import java.util.Scanner;

public class DayConverter {
    public static void main(String[] args) {
        Scanner scanner = new Scanner(System.in);

        System.out.print("Enter the number of days: ");
        int days = scanner.nextInt();

        int years = days / 365;
        int remainingDays = days % 365;

        int weeks = remainingDays / 7;
        int remainingDaysAgain = remainingDays % 7;

        System.out.println(days + " days is equal to:");
        System.out.println(years + " years");
        System.out.println(weeks + " weeks");
        System.out.println(remainingDaysAgain + " days");
    }
}
```

```
java -cp /tmp/qEI2MpJ79C/DayConverter
Enter the number of days: 12
12 days is equal to:
0 years
1 weeks
5 days
